First author (chronological)

Kok, A. (1970). The influence of speed and interval variation of serial stimuli on physiological change. *Acta Psychologica*, 34 , 22-38.

Kok, A. (1975). Individual differences in heart rate and skin resistance during information processing. *Nederlands Tijdschrift voor de Psychologie*, 30 , 255-275.

Kok, A. (1978). The effect of warning stimulus novelty on the P300 and components of the contingent negative variation. *Biological Psychology*, 6, 219-233.

Kok, A., & Jong, H. Looren de (1980). The effect of repetition of infrequent familiar and unfamiliar visual patterns on components of the event-related brain potential. *Biological Psychology*, 10 , 167-188.

Kok, A. , & Jong, H. Looren de (1980). Components of the event-related potential following degraded and undegraded visual stimuli. *Biological Psychology*, 11, 117-133.

Kok, A., & Rooyakkers, J.A.J. (1985). Comparison of event related potentials of young children and adults in a visual recognition and word reading task. *Psychophysiology*, 22 , 11-23.

Kok, A., Vijver, F.R. van de, & Rooyakkers, J.A.J. (1985). Effects of visual field, stimulus degradation and level of practice on event-related potentials of the brain. *Psychophysiology*, 22, 707-717.

Kok, A., Vijver, R.F. van de , & Bouma, A. (1985). Laterality effects of visual field and matching instruction on event-related potentials and reaction time. *Brain and Cognition*, 4 , 377-387.

Kok, A. , & Rooyakkers, H. (1986). Components of the event-related potential to laterally presented pictures and words in a semantic categorization task. *Psychophysiology*, 23 , 672-683.

Kok, A. (1986). Effects of degradation of visual stimuli on components of the event-related potential (ERP) in Go/Nogo reaction tasks. *Biological Psychology*, 23 , 21-38.

Kok, A. (1986). ERP components related to motor inhibition and motor facilitation in a visual go-nogo task. In: W.C. McCallum, R. Zappoli, & F. Denoth (Eds.), *Electroencephalography & Clinical neurophysiology, supplement no. 38: Cerebral psychophysiology: studies in event-related potential* (pp. 124-125). Elsevier, Amsterdam.

Kok, A. (1988). De psychologische betekenis van hersenpotentialen. Rede uitgesproken bij het aanvaarden van het ambt van hoogleraar in de fysiologische psychologie, Amsterdam, 14 Maart. Sneldruk, Enschedé

Kok, A. (1988). Electrofysiologische kenmerken van visuele aandacht in jonge en oude proefpersonen. In: B.G. Deelman & G. Mulder (Eds). *Nederlands Psychologisch Onderzoek* 3, (pp 33-47). Swets en Zettlinger, Amsterdam

Kok, A. (1988). Overlap between P300 and movement-related-potentials: a response to Verleger. *Biological Psychology*, 27, 51-58.

Kok, A. (1988). Probability mismatch and template mismatch: A paradox in P300 amplitude? *Behavioral and Brain Sciences*, 11 (3), 388-389.

Kok, A. (1990). Het gebruik van psychofysiologische meetmethoden in het onderzoek naar neuropsychiatrische ziektebeelden. *Acta Neuropsychiatrica*.

Kok, A. (1990). Internal and external control: a two-factor model of amplitude change of event-related potentials *Acta Psychologica*, 74, 203-236.

Kok, A., Jong, H. Looren de, Woestenburg, J.C., Logman, C.J.C.M., & Rooy, J.C.G.M. van (1987). Learning where to look: electrophysiological and behavioral indices of visual search in young and old subjects In: R. Johnson, J.W. Rohrbaugh, & R. Parasuraman (Eds.), *Current trends in event-related potential research*. EEG Supplement 40, (pp. 204-210). Amsterdam : Elsevier (Biomedical Division).

Kok, A., Lorist, M.M., Cremer, R., & Snel, J. (1994). Age-related differences in mental work capacity: effects of task complexity and stressors on performance. In: J. Snel & R. Cremer (Eds) *Work and Aging: A European perspective*, (pp 139-161). Taylor and Francis, London .

Kok, A., Zeef E.J., Kenemans, J.L., & Sonke, C. (1995) Age-related decline in visual selective attention functioning: evidence derived from ERP paradigms In: Karmos G., Molnar M., Csépe I. & Desmedt J.E. (Eds). *Electroencephalography and Clinical Neurophysiology*. Suppl nr 44 (pp. 347-357). Elsevier, Amsterdam

Kok, A., Kenemans L.J., Zeef E.J., Lorist, M.M., Ridderinkhof, M.R., & vanderStelt, O. (1996) Selective processes in development and aging: event-related potential studies. In: C. Ogura, Y. Koga & M. Shimokochi (Eds). *Recent advances in event-related brain potential research*, (pp. 721-732). Elsevier, Amsterdam

Kok, A., & Boelhouwer, J. (Eds) (1997). *Aandacht, een psychofysiologische benadering*. Assen, van Gorcum

Kok, A. (1997). Book review: Posner, M.I. *Images of Mind*. *Acta Psychologica*. 95, 97-100.

Kok, A. (1997). Event-related potential (ERP) reflections of mental resources: a review and synthesis. *Biological Psychology*, 45, 19-56.

Kok, A., & Kramer, A. (1997). Preface. *Biological Psychology*, 45, 1-4.

Kok, A. (1997). ERP reflecties van mentale inspanning. In: Kok, A. & Boelhouwer, J. (Eds). *Aandacht, een psychofysiologische benadering* (pp. 119-163). Assen, van Gorcum.

Kok, A., & Talsma, D. (1997). Aging and inhibition: multiple inhibitory systems. In: G.J.M. van Boxtel & K.B.E. Böcker (Eds). *Brain and Behavior. Past, present and future*. (pp. 93-104). Tilburg, Tilburg University Press.

Kok, A., & Talsma, D. (1999). Aging and inhibition: multiple inhibitory systems. In: M. Falkenstein, J. Hohnsbein and P. Ullsperger. (Eds.) Cognitive changes due to aging and fatigue as revealed in Electrical Brain Activity, (pp. 100-111). Berlin, BAUA.

Kok, A. (1999). Varieties of Inhibition: manifestations in cognition, event-related potentials and aging. *Acta Psychologica*, 101, 129-158.

Kok, A. (2000). Age-related changes in involuntary and voluntary attention as reflected in components of the event-related potential (ERP). *Biological Psychology*, 54, 107-143.

Kok, A. (2001) On the utility of P3 amplitude as a measure of processing capacity. *Psychophysiology*, 38, 557-577.

Kok, A., Ramautar, J.R., DeRuiter, M.B., Band, G.P.H., & Ridderinkhof, K.R. (2004). ERP components associated with successful and unsuccessful stopping in a stop-signal paradigm. *Psychophysiology*, 42, 9-20.

Kok, A. (2004) The aging homunculus: the decline of selective attention and executive control processes with normal aging. In: I. Reinvang, M.W., Greenlee & M. Hermann (Eds). *The Cognitive Neuroscience of Individual Differences* (pp 225-241). Hanse Studien. Hanse Institute für Wissenschaft Bremen.
