Introduction

These Enrolment Provisions contain procedural rules with regard to enrolment at the University of Amsterdam pursuant to Chapter 7, Title 2 and 3 of the Dutch Higher Education and Research Act *(Wet op het Hoger Onderwijs en Wetenschappelijk Onderzoek – WHW)* and the tuition fee rates
for the 2027-2028 academic year. They apply to students, external candidates and participants in a pre-Master's programme or teaching module and those who want to enrol as such.

The Head of the CSA is charged with the implementation of these Enrolment Provisions.

Unless otherwise stated, the dates stated in these provisions are dates that precede the 2027-2028 academic year, or the enrolment for this academic year.

The appendices to these Enrolment Provisions include an overview of the institutional tuition fee rates and the UvA Regulations governing Recommendations on Choice of Degree Programme, the UvA Regulations for Selection and Placement in Degree Programmes with an Enrolment Quota, the faculty regulations for each degree programme with an enrolment quota and the UvA Regulations on Student Intake in the Post-Propaedeutic Phase.

Chapter 1 Enrolment

Article 1 General enrolment conditions

1. Enrolment as a student, external candidate and participant in a pre-Master's programme or teaching module[1] is only open to those who meet the statutory educational entry requirements and admission requirements as stated in Chapter 7, Title 2 and 3 of the WHW, or those who, pursuant to the law, have been granted an exemption with regard to these educational entry requirements on behalf of the Executive Board.
2. Applicants who do not have Dutch nationality and who wish to enrol at the UvA for the first time must submit a copy of a valid passport/identity card.
3. Applicants who are not nationals of a country that is part of the EEA must demonstrate that, on the first day of the degree programme in which they are enrolling,[2] they are lawfully resident in the Netherlands. They can do so by means of:
   a. a copy of the extract from the Personal Records Data Base (Basisregistratie Personen – BRP), or
   b. a copy of the front and back of a valid residence permit, or
   c. a copy of a permit for the Applicant's permanent residence, or
   d. a copy of the proof of payment or the receipt of the application for the Applicant's residence permit, or
   e. a copy of the valid passport of the Applicant bearing the MVV sticker (Authorisation for Temporary Stay – Machtiging tot Voorlopig Verblijf), or
   f. evidence of a request to extend a residence permit or a receipt from the IND or a request to transfer the associated charges.

   It is a matter for the Director of Student Services to determine whether the UvA will act as referee for an Applicant for the purpose of applying for a residence permit. In doing so, the Director of Student Services will consider the obligations incumbent upon the UvA as a recognised referee based on legislation and regulations, as well as the policy rules, manuals and instructions of the IND.
4. In the event of enrolment for 1 September, Applicants must comply with the payment obligation no later than on 31 August, and, in the event of enrolment for 1 February, no later than
   on 31 January, by:
   a. giving the university a one-off direct debit mandate through Studielink to collect the tuition fees owed, in a lump sum or in instalments, or
   b. paying the tuition fees directly through iDEAL, credit card or direct transfer, or
   c. submitting an original tuition fee payment receipt from an institution for higher education if statutory tuition fees are owed[3], or
   d. in exceptional cases: evidence that the tuition fees owed will be paid in a different manner to be determined by the Head of the CSA.
5. The assessment of qualifications that were not issued in the Netherlands is subject to an application fee of €100.

---

[1] Hereafter referred to as *the Applicant* or *Applicants.*

[2] The first day of the degree programme in which they are enrolling after a break in enrolment is deemed to be equivalent to the first day of the degree programme in which they are enrolling. At that point, the Applicant must again prove lawful residence.

[3] Section 7.48, first paragraph of the WHW

Adopted by the Executive Board,
decision number 2026-052627

Article 2 Further enrolment conditions for first enrolment in a Bachelor's programme

Educational entry requirements

1. For a first enrolment in a Bachelor's programme, verification of prior (VWO) education, or evidence that one of the requirements referred to under 2, 3 or 4 has been met, must be received, through Studielink, no later than on 31 August.
2. If an Applicant wishes to enrol on the basis of a first-year diploma of higher professional education (HBO) and the requirements as set out in Appendix 4 have not been met, the dean of the faculty of which the degree programme is part must provide proof of sufficient prior education (Appendix 5).
3. An Applicant who wishes to enrol on the basis of non-Dutch prior education[4] or an old VWO diploma[5] requires proof that the Head of the CSA has exempted them from meeting the educational entry requirements (BVO).
4. Applicants who wish to enrol on the basis of an entrance examination must submit proof from the entrance examination committee of the degree programme showing that they have proved to be suitable for the relevant programme in accordance with Section 7.29 of the WHW.

Selective admission degree programmes

5. For the 2027-2028 academic year, there are enrolment quotas as defined by Section 7.53 of the WHW for the Bachelor's programmes in Biomedical Sciences, Medicine, Psychobiology, Dentistry and Psychology[6] and for the English-language tracks of the Bachelor's programmes in Business Administration, Economics and Business Economics, and Political Science. For these Bachelor's programmes or the tracks thereof that are subject to a quota, the following additional conditions apply:
   a. enrolling in the relevant degree programme or track, through Studielink, by no later than **15 January**, and
   b. meeting the requirements as stated in the UvA Regulations for Selection and Placement in Degree Programmes with an Enrolment Quota, and complying with the further rules regarding the selection procedure and criteria for the relevant degree programme/track as laid down in Appendix 9, and
   c. redeeming in a timely fashion the placement certificate that is provided through Studielink if the Applicant has been selected for the relevant degree programme/track.

   If the further rules specify that selection takes place on the basis of a weighted or unweighted draw, the draw will be carried out by the CSA in the presence of a civil-law notary appointed by or on behalf of the Director of the Administration Centre.
6. The Bachelor's programmes in Liberal Arts and Sciences and PPLE are degree programmes that offer small-scale, intensive education within the meaning of Section 6.7 of the WHW. For these degree programmes, the following additional conditions apply:
   a. enrolling through Studielink by **1 February**; and
   b. proof from the selection committee of the relevant degree programme that the Applicant has been selected for the relevant degree programme.

[4] In accordance with Section 7.28 of the WHW
[5] For additional conditions for old and old-style VWO diplomas, see Appendix 4.
[6] There are enrolment quotas for the Bachelor's programmes in Psychology relating to both the Dutch and English-language tracks.

Adopted by the Executive Board,
decision number 2026-052627

Other Bachelor's programmes

7. For the non-selective admission Bachelor's programmes or tracks thereof, the following additional conditions apply:
   a. enrolling through Studielink in the relevant degree programme or track by no later than **1 May**, and
   b. meeting the requirements as stated in the UvA Regulations governing Recommendations on Choice of Degree Programme, Appendix 8, which includes participation in the mandatory UvA Matching, unless the Applicant has been exempted from this on the basis of the UvA Regulations governing Recommendations on Choice of Degree Programme.

Article 3 Further enrolment conditions for enrolment in a pre-Master's programme or teaching module

The following additional requirements apply for enrolment in a pre-Master's programme or teaching module:

a. meeting the educational entry requirements as stated in Article 2, and
b. enrolling in the relevant pre-Master's programme or teaching module through Studielink by no later than 31 August for a 1 September enrolment, and by no later than 31 January for a 1 February enrolment, and
c. proof from the dean of the faculty for the pre-Master's programme or teaching module showing that the Applicant is admitted to the relevant pre-Master's programme or teaching module. The dean may stipulate in the OER that proof of admission will only be provided if enrolment took place before 31 August or 31 January.

Article 4 Further enrolment conditions for first enrolment in a Master's programme

The following additional requirements apply to a first enrolment in a Master's programme:

a. enrolling in the relevant Master's programme through Studielink by no later than 31 August for a 1 September enrolment, and by no later than 31 January for a 1 February enrolment, and
b. proof of admission issued by or on behalf of the dean of the faculty for the relevant Master's programme (TLM). The dean may stipulate in the OER that proof of admission to the Master's programme will only be provided if enrolment took place before 31 August or 31 January.

Article 5 Further enrolment conditions for re-enrolment

To re-enrol in a degree programme, students must enrol through Studielink in the relevant degree programme as a re-enrolling student by no later than 31 August for a 1 September enrolment, and by no later than 31 January for a 1 February enrolment.

Adopted by the Executive Board,
decision number 2026-052627

Article 6 Cancellation and refusal of enrolment

1. Those who have applied for a degree programme through Studielink and wish to cancel the enrolment before the start of the new academic year must communicate this, through Studielink, by no later than 31 August.[7]
2. Students who have received a negative binding study advice for a degree programme are not enrolled in the relevant degree programme or in degree programmes that share a propaedeutic phase with the relevant degree programme for the timeframe specified in the OER of the degree programme for which the study advice was received.
3. Those whose previous enrolment was terminated early in connection with serious fraud, as stipulated in Section 7.12b, second paragraph of the WHW, will be refused enrolment.
4. The enrolment of those whose enrolment at the UvA or another higher education institution has been refused or terminated early because their actions or remarks show that they are unsuitable either for practising one or more of the professions for which the relevant programme trains students, or for the practical preparation for professional practice as laid down in Section 7.42a of the WHW, may be refused if the enrolment concerns the same or a related degree programme.
5. Those whose previous enrolment was terminated early in connection with a violation of the house rules or disciplinary measures, as stipulated in Section 7.57h, first or second paragraph of the WHW, can be refused enrolment.
6. Enrolment will be refused if the UvA has outstanding claims against the Applicant with regard to tuition fees, examination fees or the fee for a pre-Master's programme or teaching module.

Article 7 Enrolment start date

1. Enrolment will only take place after all the enrolment conditions have been met in time.
2. Enrolment is only possible as of 1 September and, where indicated for the relevant degree programme, as of 1 February. Guest students can enrol in other months. For the Master's programme in Medicine, Applicants can enrol in other months as well.[8]
   a. The enrolment will be effective from **1 September** if all the enrolment conditions as of 1 September are met before **1 September**.
   b. The enrolment will be effective from **1 February** if the degree programme has indicated that enrolment as of 1 February is possible and all the enrolment conditions as of 1 February are met **before 1 February**.
3. Enrolment with retroactive effect is not possible, unless the enrolment was demonstrably delayed by circumstances that can be blamed on the UvA, or in the event that a placement certificate for a degree programme with an enrolment quota is issued just in time for it to be redeemed after 1 September.

[7] If the Applicant cancels the enrolment before the start of the academic year, through Studielink, there will be no enrolment for the relevant academic year.

[8] In connection with the spread intake in internships.

Article 8 Enrolment end date

Adopted by the Executive Board,
decision number 2026-052627

The enrolment ends on 31 August of the relevant academic year, unless the enrolment is terminated in the interim in accordance with Article 10.

Article 9 Proof of enrolment and UvA proof of identity

1. After the enrolment requirements have been met and the Applicant has been enrolled, they will be provided with proof of enrolment.
2. Upon first enrolment, an UvA proof of identity (student ID card) will be provided. In the event of loss or theft of the student ID card, a duplicate can be obtained for €15 if no police report can be submitted.

Article 10 Termination of enrolment

1. Based on a request for termination of enrolment submitted through Studielink, the enrolment as a student, external candidate or participant in a pre-Master's programme or teaching module will be terminated on the basis of the provisions of Section 7.42, first paragraph of the WHW for the current academic year, effective from the following month.[9] The enrolment cannot be terminated with retroactive effect.
2. The enrolment of a student who has received a negative binding study advice can be terminated on the basis of the provisions of Section 7.8b, fifth paragraph of the WHW.
3. Enrolment may be terminated based on the following provisions:
   - Section 7.12b, second paragraph of the WHW, serious fraud.
   - Section 7.42, second paragraph of the WHW, failure to pay.
   - Section 7.42a of the WHW, behaviour or statements in conflict with the future professional practice.
   - Section 7.57h, first or second paragraph of the WHW, violation of the house rules or disciplinary measures.

Chapter 2 Payment conditions

Article 11 Payment of tuition fees, examination fees and the fee for a pre-Master's programme or teaching module

1. The tuition fees, examination fees or fee for a pre-Master's programme or teaching module must be paid as a lump sum, or in ten instalments if the Applicant enrols as of 1 September insofar as it concerns the tuition fees or the examination fees, and in five instalments insofar as it concerns the fee for a pre-Master's programme or an enrolment as of 1 February. In the event of payment in instalments, a one-off €24 administration fee will be charged.
2. Payment in instalments is possible for all types of enrolment referred to in these provisions, under the applicable conditions.
3. In the event of payment in instalments, every instalment will be offset against the oldest outstanding claim with regard to the tuition fees, examination fees or fee for a pre-Master's programme or teaching module for the relevant academic year against the person for whose benefit the payment has been made.

[9] In the event of termination with effect from July or August, there will be no reimbursement of tuition fees. For other rules relating to the reimbursement of tuition fees, see Article 12

4. If a direct debit mandate has been provided for collection of the tuition fees, examination fees or fee for a pre-Master's programme or teaching module owed, and collection is not possible, an ultimatum of a total of three collection attempts will be set, within which the amounts owed must be paid. If the amounts owed are not paid within that term,

enrolment will be terminated with due observance of the provisions of Section 7.42, second paragraph of the WHW.

5. If enrolment takes place as of a date after 1 September, the tuition fees or examination fees will be calculated in proportion to the number of months remaining of the relevant academic year.
6. A student in respect of whom the Director of Student Services has issued a statement to the effect that he/she meets the conditions with regard to the tuition fee waiver for students serving on a board as set out in Part 4 of the Student Support Fund Regulations, will be exempt from paying statutory tuition fees for no more than one academic year.
7. If, in the course of the academic year, it becomes apparent that a student who has been exempted from paying statutory tuition fees in accordance with the sixth paragraph must pay institutional tuition fees, or is attending courses at the UvA or taking examinations or final examinations at the UvA, the student will be charged the tuition fees owed for the relevant degree programme.

Article 12 Reimbursement of tuition fees, examination fees or the fee for a pre-Master's programme or teaching module

1. The tuition fees based on this scheme will be reimbursed after termination as referred to in Section 7.42, first paragraph of the WHW, on the understanding that one-twelfth of the tuition fees owed will be reimbursed for each month that is left of the academic year, with due observance of the provisions of the second paragraph. Tuition fees will only be reimbursed if enrolment in all degree programmes is terminated.
2. If enrolment is terminated with effect from July or August, there will be no entitlement to a reimbursement of tuition fees.[10]
3. In the event that the tuition fees have been paid to another institution by means of an original tuition fee payment receipt from the UvA, the request for reimbursement of tuition fees will

   only be granted after the original tuition fee payment receipt or proof of termination of enrolment from another higher education institution has been submitted.
4. Upon termination of enrolment in a pre-Master's programme or teaching module or as an external candidate, there is no entitlement to reimbursement of tuition fees or examination fees respectively.

Article 13 Administration fee

Those who wish to obtain a degree certificate as referred to in Section 7.11 of the WHW and cannot submit the relevant proof of enrolment will not obtain the degree certificate until payment of a fee to the amount of the tuition fees owed for the period(s) in which there was no enrolment, but in which the students passed the examinations associated with the final examination (with the official intake dates being taken as the start dates), plus a €200 administration fee.

---

[10] This means that if the request is submitted in June, July or August before the termination of the enrolment, there is no entitlement to reimbursement of tuition fees for July and August.

Chapter 3 Statutory tuition fees

Article 14 Tuition fee rates

1 In the 2027-2028 academic year, the following tuition fee rates apply:
   a. full statutory tuition fees €2,771;

b. partial statutory tuition fees €2,361;
c. full statutory tuition fees for the intensive small-scale programmes in Liberal Arts and Sciences €5,780 and PPLE €5,819.

2 The tuition fee rate owed is determined on the basis of the information known to the institution, through Studielink, at the time of the enrolment. In the event that, at a later stage, the tuition fee rate proves to have been determined on the basis of incorrect or incomplete information, the institution reserves the right to charge the correct rate retroactively.

Article 15 Statutory tuition fees for a full-time degree programme

1. Those who enrol in a full-time degree programme as students and, at the start of the academic year, meet the requirements listed in the first, second, third or sixth paragraph of Section 7.45a of the WHW, must pay the full statutory tuition fees of €2,771.
2. Those who enrol as students in the joint degree Bachelor's programme in Liberal Arts and Sciences or the Bachelor's programme in PPLE and, at the start of the academic year, meet the requirements listed in the first, second, third or sixth paragraphs of Section 7.45a of the WHW, must pay the full statutory tuition fees for intensive small-scale programmes as referred to in Article 14(1)(c).

Article 16 Statutory tuition fees for a part-time degree programme

Those who enrol as students in a part-time degree programme and, at the start of the academic year, meet the requirements listed in the first, second, third or sixth paragraph of Section 7.45a of the WHW, must pay the partial statutory tuition fees of € 2,361.

Article 17 Statutory tuition fees for a dual degree programmes

1. Those who enrol as students in a dual degree programme and, at the start of the academic year, meet the requirements listed in the first, second, third or sixth paragraphs of Section 7.45a of the WHW, must pay the full statutory tuition fees of €2,771.

Adopted by the Executive Board,
decision number 2026-052627

Chapter 4 Institutional tuition fees

Article 18 Institutional tuition fees for full-time, part-time and dual degree programmes

1. Those who enrol as students in a full-time, part-time or dual degree programme and do not meet the requirements listed in the first, second, third or sixth paragraph of Section 7.45a of the WHW must pay institutional tuition fees equal to the institutional rate as stated in Appendix 1, unless the Executive Board determines otherwise (Appendices 2 and 3).
2. Students from countries outside of the EEA who enrol through the UAF pay the same rates as students from countries within the EEA.
3. The tuition fee rate owed is determined on the basis of the information known to the institution, through Studielink, at the time of the enrolment. In the event that, at a later stage, the tuition fee rate proves to have been determined on the basis of incorrect or incomplete information, the institution reserves the right to charge the correct rate retroactively.

Article 19 Institutional tuition fees in the event of enrolment in more than one programme

1. Those who are enrolled as students at another Dutch higher education institution and have paid the institutional rate there will owe the full institutional rate upon enrolment at the UvA if they are not entitled to the statutory rate at the UvA, without prejudice to the conditions set out below.
2. Those who are enrolled as students at an institution or in a degree programme, as stated in Appendix 3 to these Provisions, and have paid the institutional rate will, when enrolling at the UvA as a student and providing proof of the tuition fees paid, be exempt from paying tuition fees to the UvA. A student who has paid the institutional rate to the UvA and enrols as a student in a second or subsequent degree programme at the UvA that is also subject to an institutional rate will be exempt from paying tuition fees for the degree programme for which the lowest institutional tuition fees are owed.
3. Those who are enrolled at another Dutch higher education institution and have paid the institutional rate there will, when enrolling at the UvA as a guest student, be exempt from paying tuition fees if the tuition fees paid to the other institution are higher than or equal to the institutional tuition fees payable to the UvA. If the tuition fees paid to the student's own institution are lower than the UvA's tuition fees, the difference must be paid.

Article 20 Scheme for students who enrol at the UvA for a second Bachelor's or Master's programme immediately after their first

For students who, after completing a first Bachelor's programme at the UvA for which statutory tuition fees were payable, enrol in a second Bachelor's programme at the UvA or, after completing their first Master's programme at the UvA, enrol in a second Master's programme at the UvA, the institutional fees are equal to the statutory fees if the following conditions have been met:

1. the first Bachelor's or Master's degree was obtained at the UvA, and
2. the first Bachelor's or Master's degree obtained at the UvA was obtained within the applicable official duration of the degree programme + 1 year (c+1), and
3. the enrolment in the second Bachelor's or Master's programme at the UvA takes place immediately after the enrolment in the first Bachelor's or Master's programme at the UvA, and
4. the institutional rate at the level of the statutory rate applies for the official duration + 1 year (c+1) of the second Bachelor's or Master's programme at the UvA and, in the event of continuous enrolment, for the second Bachelor's or Master's programme, and
5. the second Bachelor's or Master's programme is completed within the official duration + 1

year (c+1) of the degree programme.
The higher institutional rate will apply if these conditions are not met.
The higher institutional rate will be charged retroactively if at any time it appears that these conditions are not being met.
Enrolment in a second Master's programme at the UvA is classified as a consecutive Master's programme when a pre-Master's programme of up to 60 ECTS[11] is taken immediately after completion of the first Master's programme at the UvA, enrolment in the second Master's programme takes place immediately after completion of this pre-Master's programme and all other conditions mentioned in this article have been met.

Article 21 Transitional arrangement for students who enrol in a Bachelor's or Master's programme at the UvA on or before 1 September 2026

Students who enrol in a Bachelor's or Master's programme at the UvA on or before 1 September 2026 and owe institutional tuition fees in respect thereof will – insofar as the institutional tuition fees for the relevant Bachelor's or Master's programme exceed the institutional tuition fees that applied for the relevant programme at the start of the degree programme, and the enrolment is not interrupted for the official duration of the degree programme plus one academic year – owe the institutional tuition fee rate to the amount of the institutional tuition fee rate that applied at the start of the relevant Bachelor's or Master's programme.[12] The annual indexation for this group of students is capped at plus five per cent.

Chapter 5 Costs of a pre-Master's programme, teaching modules and examination fees

Article 22 Fees for enrolment in a pre-Master's programme or teaching module

1. Those who already hold a Bachelor's degree and enrol in a Bachelor's programme for the 2027-2028 academic year in order to take the pre-Master's programme and be admitted to a Master's programme at the UvA will owe fees amounting to €46.18 per ECTS for this pre-Master's programme, up to a maximum of €2,771.
2. Those who already hold a Bachelor's degree and enrol in a Bachelor's programme for the 2027-2028 academic year to take a teaching module in order to obtain a limited second-level qualification will owe fees for this 30-ECTS programme in the amount of €46.18 per ECTS, with a maximum of half the full statutory tuition fee rate, €1,385.50.
3. Those enrolled in a pre-Master's programme or taking a teaching module who are also taking a course for which statutory tuition fees are payable will be exempt from paying the fees for the pre-Master's programme or teaching module once proof is provided that these tuition fees have been or will be paid.
4. Those enrolled in a pre-Master's programme or teaching module who take examinations or final examinations relating to units of study or degree programmes that are not part of the pre- Master's programme or teaching module must pay the institutional tuition fee rate in accordance with the provisions of Chapter 4.

---

[11] If the pre-Master's programme is taken within one academic year.

[12] These are the institutional tuition fees as set in the relevant Enrolment Provisions, without any discounts or allowances applied in connection with Covid-19.

Article 23 Examination fees for external candidates

Those who enrol in a degree programme as external candidates will owe examination fees per degree programme, to the amount of the full statutory tuition fees owed in the event of full-time

Adopted by the Executive Board,
decision number 2026-052627
enrolment.

Article 24 Recalculation of the fees for a pre-Master's programme or teaching module or of examination fees

The fees payable for a pre-Master's programme or teaching module and the examination fees are determined on the basis of the information that is known to the UvA, through Studielink, at the time of enrolment. In the event that, at a later stage, the fees prove to have been determined on the basis of incorrect or incomplete information, the correct fees will be charged retroactively.

Chapter 6 Hardship clause and implementing regulation

Article 25 Hardship clause

The Executive Board may derogate from these Enrolment Provisions if a stipulation in these regulations would result in an exceptional case of extreme unfairness.

Article 26 Implementation of the Enrolment Provisions

The Head of the CSA is charged with implementing these Enrolment Provisions.

Article 27 Entry into effect and short title

1. These provisions will enter into effect on 1 October 2026 and apply to enrolments for the 2027-2028 academic year.
2. These provisions may be referred to as the 'Enrolment Provisions for the University of Amsterdam 2027-2028'.

Adopted by the Executive Board,
decision number 2026-052627

Explanation of the determination of rates in the Enrolment Provisions for the University of Amsterdam 2027-2028

Statutory tuition fees

Full and reduced statutory tuition fees

Section 7.45 of the Dutch Higher Education and Research Act *(Wet op het Hoger onderwijs en Wetenschappelijk onderzoek – WHW)* stipulates that the amount of the statutory tuition fees is determined by order in council. This is worked out in further detail in Sections 2.2 and 2.4-2.4f of the WHW Implementation Decree of 2008 and in Section 9 of the Regulations on the Financing of Higher Education. The Ministerial Regulation amending the Regulations on the Financing of Higher Education, published on 12 June 2025, stipulates that the full statutory tuition fees for the 2027-2028 academic year amount to €2,771.

Increased statutory tuition fees for degree programmes that offer small-scale, intensive education

The joint degree Bachelor's programme in Liberal Arts and Sciences at Amsterdam University College and the Bachelor's programme in PPLE have been designated as small-scale, intensive education programmes by the Minister of Education, Culture and Science. Higher tuition fees are payable for these degree programmes, pursuant to Section 6.7, first and fifth paragraphs of the WHW.

Part-time rate

The partial statutory tuition fees as determined for the 2027-2028 academic year have been indexed in line with the indexing of the full statutory tuition fees.

Institutional tuition fee rates

Students who do not meet the requirements for the statutory tuition fees (cf. Section 7.45a, first, second, third and fifth paragraph of the WHW) will owe the higher institutional fees unless a certain exceptional rule applies. The institutional tuition fees are determined by the institutional management in accordance with Section 7.46 of the WHW. On 1 January 2024, the Executive Board adopted the policy for the institutional tuition fee rates for the period from 2025-2026 to 2031-2032. The methodology for setting the institutional tuition fees is based on the principle that the institutional tuition fee rates must at least cover costs. Since degree programme costs are not defined per unit, an attempt has been made to find the best possible alternative for calculating these tuition fees. The opportunity costs are the economic costs, which put a value on the (unrealised) yield of the best possible alternative. The rates are calculated on the basis of a missed government grant, with the rate being based on the most recent definitive government grant, consisting of a variable education and research component for funded students (student-specific funding), plus supplementary funding for the fixed amount for education ('supplementary education funding expressed as a percentage'), supplementary funding for research intensity (research-intensive education) and the statutory tuition fees for the relevant academic year. The rates are differentiated by phase and duration of the degree programme (Bachelor's programme or 1, 2 or 3-year Master's programme) and funding level (low, high and top). This methodology takes into account the distinction made in the government grant and the associated expected cost pattern of the various degree programmes. An additional fee (surcharge) is usually requested from non-EEA students on account of additional costs incurred by the university for providing indirect support. Regulations have been adopted for cases where institutional tuition fee rates have increased from the previous academic year. Students paying the institutional tuition fees are entitled to the fees applicable at the start of the relevant degree programme, for the official duration of the

programme plus one academic year. This rate will be adjusted on an annual basis only for wage and price increases (indexation) up to a maximum indexation of plus five per cent. These regulations were adopted to avoid confronting students with a fee increase during their enrolment in a degree programme, other than a standard adjustment for wage and price increases (indexation), for which a ceiling of plus five per cent has been set.
In addition, the Executive Board has set different institutional tuition fee rates for certain specific cases. These exceptions set out in Appendices 2 and 3 to the Enrolment Provisions, among other places. The entire policy document can be found on the UvA website.

Tuition fees for a second degree programme

The WHW stipulates that one of the conditions for entitlement to statutory tuition fees is that the student has not already obtained a Bachelor's degree or Master's degree. This does not apply if the second degree programme is a first enrolment in a teaching or health care degree programme. In addition, pursuant to Section 7.45a(3) and the WHW Implementation Decree 2008, students who enrol in a second Bachelor's programme while still enrolled in a first Bachelor's programme, or enrol in a second Master's programme while still enrolled in a first Master's programme, may – after obtaining the diploma for the first degree programme – complete the second at the full statutory tuition fees, provided the enrolment is not interrupted.

Fees owed for pre-Master's programmes and teaching modules

Pursuant to Section 7.49b of the WHW, the institutional management determines the fees owed for a pre-Master's programme or teaching module[1]. Pursuant to Section 7.49b of the WHW, those who already have a Bachelor's diploma and enrol in a Bachelor's programme at the UvA to take a pre-Master's programme with a study load of less than 60 ECTS or a teaching module must pay a fee amounting to no more than a proportionate part of the full statutory tuition fees. For a pre-Master's programme with a study load of 60 ECTS or more, they must pay no more than the full statutory tuition fees. Those who do not fall into any of the groups referred to in Section 2.2 of the Student Finance Act 2000 and who are not nationals of Suriname (students from non-EEA countries) must pay *at least* the statutory tuition fees (or a proportionate part thereof). Those enrolled in a pre-Master's programme or teaching module who are also taking a degree programme for which statutory tuition fees as referred to in Section 7.45(1) of the WHW are payable will be exempt from paying the fee for the pre-Master's programme or teaching module, provided they can demonstrate that the relevant tuition fees have been or will be paid.

Regulations for a second degree programme at the UvA immediately after the first degree programme

For students who enrol in a second Bachelor's programme at the UvA immediately after completing their first Bachelor's programme at the UvA (for which statutory tuition fees are payable) within the official duration + 1 year or enrol in a second Master's programme at the UvA immediately after completing their first Master's programme at the UvA (for which statutory tuition fees are payable) within the official duration + 1 year, transitional provisions apply under strict conditions. The third condition stipulates that the enrolment in the second degree programme must take place immediately after completion of the first degree programme. To determine what qualifies as 'immediately after', the student is dependent on the possible intake dates for the second degree programme. It has been agreed with the CSR that, after completion of a first Master's programme at the UvA, a consecutive Master's programme at the UvA includes enrolment in a second Master's programme at the UvA

[1] Section 1.1, paragraph dd1 of the WHW: *part of a Bachelor's programme in higher education worth 30 credits that prepares students for the teaching of a profession within the meaning of Section 7.12, second paragraph of the Secondary Education Act 2020*

Adopted by the Executive Board,
decision number 2026-052627

immediately after completion of a required pre-Master's programme at the UvA, provided that the other conditions are also met. For the sake of clarity: this means that a pre- Master's programme (worth a maximum of 60 ECTS in one academic year) has been taken immediately after completion of a first Master's programme at the UvA within the official duration + 1 year (i.e. Master's/pre-Master's/Master's, and not Bachelor's/pre-Master's/Master's) and the pre-Master's programme at the UvA is immediately followed by enrolment in a second Master's programme at the UvA. The nominal duration of a part-time degree programme is the nominal duration of the full-time version of the same degree programme, times two.

Entry into effect and scope

The Enrolment Provisions will enter into effect on 1 October 2026 and apply to applications for enrolment and termination of enrolment for the 2027-2028 academic year. The Enrolment Provisions do not apply to postgraduate Master's programmes or contract teaching.

Appendix 1

UvA institutional tuition fee rates for the 2027-2028 academic year

Institutional tuition fees for second or subsequent degree programme*	
€14,300	for Bachelor's programmes at the Faculty of Economics and Business
€16,000	for Bachelor's programmes at the Faculty of Humanities and Amsterdam Law School, with the exception of the Bachelor's programme in Politics, Psychology, Law and Economics (PPLE)
€17,700	for the Bachelor's programme in Politics, Psychology, Law and Economics (PPLE)
€15,150	for Bachelor's programmes at the Faculty of Social and Behavioural Sciences, with the exception of the Bachelor's programme in Computational Social Science
€19,700	for the Bachelor's programme in Medical Informatics at the Faculty of Medicine
€19,900	for the Bachelor's programmes at the Faculty of Science
€19,300	for the Bachelor's programme in Computational Social Science at the Faculty of Social and Behavioural Sciences
€31,400	for the Bachelor's programme in Medicine at the Faculty of Medicine and for the Bachelor's programme in Dentistry at the Faculty of Dentistry
€12,000	for the one-year teacher training programmes at the Faculty of Social and Behavioural Sciences (Master's, ILO)
€23,500	for the one-year Master's programmes at Amsterdam Law School and at the Faculty of Behavioural Sciences (Master's, ILO)
€20,300	for the one-year Master's programmes in the Faculty of Economics and Business
€31,100	for the one-year Master's programmes at the Faculty of Science
€21,300	for the one-year and two-year Master's programmes at the Faculty of Social and Behavioural Sciences, with the exception of the one-year teacher training programmes (Master's, ILO)
€18,500	for the two-year Master's programmes at the Faculty of Humanities, with the exception of the two-year Master's programme in Conservation and Restoration of Cultural Heritage
€23,600	for the two-year Master's programme in Conservation and Restoration of Cultural Heritage at the Faculty of Humanities and for the two-year Master's programmes at the Faculty of Science
€23,500	for the two-year Master's programme in Medical Informatics at the Faculty of Medicine
€33,800	for the three-year Master's programme in Medicine at the Faculty of Medicine and the three-year Master's programme in Dentistry at the Faculty of Dentistry
***This is a second or subsequent degree programme within the meaning of Section 7.45a, paragraph 1 of the Dutch Higher Education and Research Act (WHW). The degree programmes are not joint degrees.**	

Institutional tuition fees for second or subsequent degree programme*, joint degrees	
€19,900	for the joint degree Bachelor's programmes in Chemistry and Physics and Astronomy at the Faculty of Science
€21,160	for the joint degree Bachelor's programme in Liberal Arts and Sciences (AUC)
€16,600	for the joint degree Bachelor's programmes in Archaeology, Classics and Ancient Civilisations and Greek and Latin Language and Culture at the Faculty of Humanities
€21,200	for the Tinbergen Institute Master of Philosophy in Economics (Tinbergen Graduate School) and the joint degree Research Master's programme in Business Data Science at the Faculty of Economics and Business
€22,270	for the joint degree Master's programme in Entrepreneurship at the Faculty of Economics and Business
€23,600	for the joint degree Master's programmes in Chemistry, Physics and Astronomy and Computational Science at the Faculty of Science
€23,430	for the joint degree Master's programmes in Computer Science and Bioinformatics and Systems Biology at the Faculty of Science
***This is a second degree programme within the meaning of Section 7.45a, paragraph 1 of the Dutch Higher Education and Research Act (WHW).**	

Institutional tuition fees for non-EEA students*	
€15,730	for Bachelor's programmes at the Faculty of Economics and Business
€17,600	for Bachelor's programmes at the Faculty of Humanities and Amsterdam Law School, with the exception of the Bachelor's programme in Politics, Psychology, Law and Economics (PPLE)
€19,200	for the Bachelor's programme in Politics, Psychology, Law and Economics (PPLE)
€16,670	for Bachelor's programmes at the Faculty of Social and Behavioural Sciences, with the exception of the Bachelor's programme in Computational Social Science
€21,700	for Bachelor's programmes in Medical Informatics at the Faculty of Medicine
€21,900	for Bachelor's programmes at the Faculty of Science
€21,240	for the Bachelor's programme in Computational Social Science at the Faculty of Social and Behavioural Science
€34,500	for the Bachelor's programme in Medicine at the Faculty of Medicine and for the Bachelor's programme in Dentistry at the Faculty of Dentistry
€13,200	for the one-year teacher training programmes at the Faculty of Social and Behavioural Sciences (Master's, ILO)
€25,900	for the one-year Master's programmes at Amsterdam Law School and the Faculty of Humanities
€34,200	for the one-year Master's programmes at the Faculty of Science

€23,455	for the one-year and two-year Master's programmes at the Faculty of Social and Behavioural Sciences, with the exception of the one-year teacher training programmes (Master's, ILO)
€22,000	for the one-year Master's programmes at the Faculty of Economics and Business offered by the Amsterdam School of Economics
€24,500	for the one-year Master's programmes at the Faculty of Economics and Business offered by the Amsterdam Business School, with the exception of the one-year Master's programme in Finance
€25,300	for the one-year Master's programme in Finance at the Faculty of Economics and Business
€20,400	for the two-year Master's programmes at the Faculty of Humanities, with the exception of the two-year Master's programme in Conservation and Restoration of Cultural Heritage
€25,900	for the two-year Master's programmes in Medical Informatics at the Faculty of Medicine
€26,000	for the two-year Master's programmes in the Faculty of Science and for the one-year Master's programmes in the Faculty of Humanities and for the two-year Master's programme in Conservation and Restoration of Cultural Heritage
€37,200	for the three-year Master's programme in Medicine at the Faculty of Medicine and the three-year Master's programme in Dentistry at the Faculty of Dentistry
***These are non-EEA students within the meaning of Section 7.45a, paragraph 1 of the WHW. The degree programmes do not concern joint degrees.**	

Institutional tuition fees for non-EEA students*, joint degrees	
€21,800	for the joint degree Bachelor's programmes in Chemistry and Physics and Astronomy at the Faculty of Science
€21,160	for the Bachelor's programme in Liberal Arts and Sciences (AUC)
€17,600	for the joint degree Bachelor's programmes in Archaeology, Classics and Ancient Civilisations and Greek and Latin Language and Culture at the Faculty of Humanities
€21,200	for the Tinbergen Institute Master of Philosophy in Economics (Tinbergen Graduate School) and the joint degree Research Master's programme in Business Data Science at the Faculty of Economics and Business
€25,370	for the joint degree Master's programme in Entrepreneurship at the Faculty of Economics and Business
€26,000	for the joint degree Master's programmes in Chemistry, Physics and Astronomy and Computational Science at the Faculty of Science
€24,970	for the joint degree Master's programmes in Computer Science and Bioinformatics and Systems Biology at the Faculty of Science
***These are non-EEA students within the meaning of Section 7.45a, paragraph 1 of the WHW.**	

Appendix 2

1. For students of Columbia Law School New York who are enrolled in the LLM programme International Criminal Law, the institutional tuition fees are equal to the full statutory tuition fees. This will affect a maximum of 12 students.

2. Non-EEA students enrolled in the Logic Master's programme receiving a grant from the 'Beth scholarship' pay institutional fees equal to the full statutory tuition fees.

3. For non-EER students of the Singapore Management University (Master's of IT in Business) who, in order to obtain a double degree, are also enrolled in the Master's of Business Administration, the institutional tuition fees are equal to the full statutory tuition fees.

4. For students who have already obtained a Bachelor's diploma and are enrolling in the UPvA Bachelor's programme in Pedagogical Sciences, the institutional tuition fees are equal to the full statutory tuition fees if they are also (and first) enrolled in the relevant AUAS programme.

5. For students who have already completed a Master's in Dentistry and have received a letter of intent concerning their place in Maxillofacial Surgery at the Amsterdam UMC and will be enrolled in the Master's programme in Medicine after completing the pre-Master's in Medicine at the UvA, the institutional tuition fees are equal to the full statutory tuition fees.

6. For students who have already completed a Bachelor's or Master's or a unified study programme in Medicine, are performing doctoral research at the UvA and have received a letter of intent concerning their place in Maxillofacial Surgery at the Amsterdam UMC, the institutional tuition fees at the time of enrolment for the Bachelor's or the Master's in Dentistry are equal to the full statutory tuition fees.

7. For students who the Head of the CSA has determined meet the conditions laid down in the "Amsterdam Covenant for Access to Higher Education for Undocumented Young People " , institutional tuition fees equal to the statutory tuition fees for the 2024-2025 academic year will apply. This exception will apply for the nominal duration of the degree programme plus one year (c+1).

Appendix 3

Individuals who are enrolled in one or more of the following degree programmes at the following institutions, and who paid the institutional tuition fees there, will be exempt from paying tuition fees when registering as a student at the UvA.

1. Amsterdam University of Applied Sciences.

2. Amsterdam University College, in the case of first-time enrolment at VU University Amsterdam.

3. The following joint degrees, in the case of first-time enrolment at VU University Amsterdam.
   - Bachelor's in Chemistry;
   - Bachelor's in Physics and Astronomy;
   - Bachelor's in Archaeology;
   - Bachelor's in Greek and Latin Language and Culture;
   - Bachelor's in Classics and Ancient Civilisations;
   - Master's in Bioinformatics and Systems Biology;
   - Master's in Physics and Astronomy;
   - Master's in Chemistry;
   - Master's in Computational Science;
   - Master's in Computer Science;
   - Master's in Entrepreneurship.

4. The degree programmes offered in collaboration with VU University Amsterdam, in case of enrolment at VU University Amsterdam:
   - Bachelor's in Mathematics;
   - Master's in Mathematics;
   - Master's in Stochastics and Financial Mathematics;
   - Master's in Life Sciences;
   - Master's in Information Studies;
   - Track Green Life Sciences of the Biological Sciences Master's programme;
   - Track Ecology and Evolution of the Biological Sciences Master's programme;
   - Master's in Archaeology;
   - Research Master's in Classics and Ancient Civilisations;
   - Master's in Classics and Ancient Civilisations;
   - Dual Master's in Heritage Studies.

5. The Dutch Master's Programme in Mathematics.

6. The Master's programmes that are part of the national cooperation of language Master's programmes (Masterlanguage), i.e.:
   - Middle Eastern Studies;
   - Literary Studies;
   - Linguistics;
   - Classics and Ancient Civilisations;
   - Dutch Studies.

7. Students of the Arts and Cultural and Theology and Religious Studies Master's programmes at Utrecht University who take minors of the FGw's Master's programmes.

8. Students of the research and education Master's programmes of the Faculty of Humanities at Utrecht University, VU University Amsterdam and Leiden University who take minors of the FGw's Master's programmes.

9. Students of the following courses of the Amsterdam School of the Arts insofar as they take minors from the stated FGw courses:
   - Academy of Art Education, insofar as they take minors of the General Cultural Studies programme and the Art History programme;
   - Academy of Architecture, insofar as they take minors of the Art History programme;
   - Amsterdam Conservatory, insofar as they take minors of the Musicology programme;
   - Netherlands Film and Television Academy insofar as they take minors of the Media and Culture programme;
   - The theatre school insofar as they take minors of the Theatre Studies programme;
   - Reinwardt Academy insofar as they take minors of the General Cultural Studies programme, the Art History programme, and the Conservation and Restoration of Cultural Heritage programme.

10. Students of the Gerrit Rietveld Academie insofar as they take minors of the FGw's Art History programme and Conservation and Restoration of Cultural Heritage programme.

11. Students from other Dutch Higher Education Institutions who take minors for a maximum of 6 EC of the Master's programme in Medical Anthropology and Sociology.

Appendix 4, as referred to in Article 2 of the 2027-2028 Enrolment Provisions Admission requirements VWO old style/VWO old/first-year HBO diploma

Degree programme	VWO old style (diplomas from before the introduction of the subject combinations in secondary education)	VWO old (diplomas obtained between VWO old style and the current VWO with a change in subject combinations from 2010)	First-year university of applied sciences (HBO) diploma

UvA Regulations governing Recommendations on Choice of Degree Programme
established by decision of 2016cb0414, and most recently amended on 21 November 2017, decision number 2017-064474

Pursuant to Sections 7.31a through 7.31d of the Dutch Higher Education and Research Act *(Wet op het Hoger Onderwijs en Wetenschappelijk Onderzoek)*

UVA REGULATIONS GOVERNING RECOMMENDATIONS ON CHOICE OF DEGREE PROGRAMME

Disclaimer: This translation is provided for information purposes only. In the event of a difference of interpretation, the original Dutch version of this document is binding.

Decision no. 2017-064474
Pursuant to Article 7.31a to 7.31d of the Dutch Higher Education and Research Act *(Wet op het hoger onderwijs en wetenschappelijk onderzoek, WHW)*

Article 1

Definitions

a. Prospective students: persons who have applied, through Studielink, for a Bachelor's programme at the University of Amsterdam (UvA), who are not currently listed as enrolled in that programme and who are not eligible for enrolment in the subsequent phase of that programme.
b. UvA Matching: the choice of degree programme activity that the UvA offers to prospective students for a given Bachelor's programme prior to the start of an academic year, with a view to providing a recommendation on their choice of degree programme. The activity comprises a teaching component and a test, which form the basis for the UvA's recommendation. Both the teaching component and the test are compulsory parts of the activity.
c. Recommendation on choice of degree programme: a recommendation from the programme director concerning a prospective student's choice of degree programme, based on a test conducted as part of the UvA Matching process. A positive recommendation is not binding, it entitles the prospective student to admission to the degree programme and is valid in accordance with the UvA Enrolment Provisions.
d. Entitlement to admission to a degree programme: prospective students are entitled to admission to a degree programme if they have received a valid positive recommendation on their choice of degree programme. This entitlement to admission is important for a prospective student's enrolment at the UvA.
e. Enrolment: prospective students who meet the statutory educational entry requirements and the terms and conditions of admission stipulated in the UvA Enrolment Provisions can enrol as a student at the UvA. The head of the Central Student Administration is charged with implementing the Enrolment Provisions and determines whether prospective students can enrol as a student on the programme applied for.
f. UvA Enrolment Provisions: the decision, as referred to in WHW Section 7.33, establishing the procedural rules on the basis of which students are enrolled at the UvA for a particular academic year.
g. Selective admission degree programme: a Bachelor's programme to which a selection procedure, pursuant to Section 6.7, 7.53 or 7.56 of the WHW, applies.

Article 2

Submission of applications by 1 May

1. Prospective students who apply, through Studielink, for a Bachelor's programme at the UvA by 1 May at the latest must participate in the UvA Matching process, unless they already are or have been enrolled as a student at the UvA.

2. After participating in the UvA Matching process, prospective students are sent a recommendation on their choice of degree programme by email.
3. A positive recommendation on their choice of degree programme entitles prospective students to admission to the degree programme applied for, or another non-selective admission Bachelor's programme at the UvA.

Article 3

Recommendation on choice of degree programme

1. Prospective students receive a recommendation on their choice of degree programme once they have participated in the full UvA Matching process, including the test which forms part of it.
2. The recommendation on choice of degree programme is based on the results achieved in the UvA Matching test for the relevant degree programme.
3. A positive recommendation on a prospective student's choice of degree programme also confers entitlement to admission to that degree programme in the academic year immediately following the academic year for which the prospective student completed the UvA Matching process.

Article 4

Students who are unable to participate in UvA Matching

1. Prospective students who have not completed the full UvA Matching process are not entitled to admission to the degree programme applied for unless a valid reason prevented this.
2. At a prospective student's written request, the UvA Matching Case Committee can determine that a valid reason completely or partially preventing participation in UvA Matching existed if the prospective student has demonstrated that this failure to attend was due to compulsory attendance of classes for another programme he/she is completing, participation in another activity related to choosing a degree programme, participation in another activity related to the selection procedure for a selective admission degree programme, or exceptional personal circumstances. Another valid reason for failure to attend is the case in which the distance that a prospective student is required to travel between his/her place of residence and the location of UvA Matching is such that it causes the prospective student considerable difficulty, and sufficient efforts have not been made to enable the prospective student to participate in the UvA Matching process. The Case Committee may take account of aspects of a financial or medical nature in its decision.

Article 5

Reorientation programme

Prospective students who have participated in the UvA Matching process are entitled to attend the UvA reorientation programme. This programme is intended to provide prospective students who have doubts about their choice of programme following the UvA Matching process or who have received a negative recommendation on choice of degree programme with an opportunity to identify a suitable degree programme.

Article 6

Applications submitted or changed after 1 May

1. Prospective students who apply, through Studielink, for a Bachelor's programme at the UvA after 1 May are entitled to admission to that programme if they can demonstrate that they applied, through Studielink, for another Bachelor's programme at the UvA before 1 May and participated in the UvA Matching process.
2. Prospective students who applied, through Studielink, for a Bachelor's programme at the UvA after 1 May are entitled to admission to that programme if they can demonstrate that they applied, through Studielink, for a Bachelor's programme at another Dutch institution of higher education or, through Studielink, for a selective admission degree programme by 1 May at the latest, but were not or no longer wish to be admitted to that other programme.

Article 7

Applications submitted after 1 May

1. Prospective students who apply, through Studielink, for a Bachelor's programme at the UvA after 1 May and to whom Article 6 of these Regulations is not applicable are not entitled to admission to that programme unless they already are (or have been) enrolled at the UvA, or if one of the exceptions referred to in the present article applies.
2. The UvA Matching Case Committee can declare that a prospective student is still entitled to admission to the programme applied for where he or she provides a written statement describing exceptional circumstances that prevented submission of the application by 1 May, and where the application of paragraph 1 of the present article results in significant unfairness.
3. Prospective students who apply, through Studielink, for a Bachelor's programme at the UvA after 1 May are entitled to admission to that programme provided that they can demonstrate that they were issued a negative binding advice on continuation of studies, as referred to in WHW Section 7.8, for another degree programme at a time that made it impossible to submit the new application before the 1 May deadline.

Article 8

Applicability

1. These regulations apply to all Bachelor's programmes at the UvA, with the exception of selective admission degree programmes.

Adoption and entry into force

These regulations were adopted by the Executive Board in decision no. 2016cb0414 and took effect as of 1 January 2017, amended following the decision of 21 November 2017, no. 2017-064474.

Appendix 9

UvA Regulations for Selection and Placement in Degree Programmes with an Enrolment Quota established by decision of 2016cb0257, and most recently amended on 19 September 2017, decision number 2017-064377 and the faculty selection regulations adopted on 23 June 2026, decision number 2026-044699 and 29 September 2026, decision number 2026-056422.

UNIVERSITY OF AMSTERDAM

UvA Regulations for Selection and Placement in Degree Programmes with an Enrolment Quota

Disclaimer: This translation is provided for information purposes only. In the event of a difference of interpretation, the original Dutch version of this document is binding.

Pursuant to Section 7.53 of the Dutch Higher Education and Research Act *(Wet op het hoger onderwijs en wetenschappelijk onderzoek, WHW)* and the Higher Education Application and Selection Regulations *(Regeling aanmelding en toelating hoger onderwijs, RATHO)*.

Article 1

Definitions

a. prospective students: persons who have applied, through Studielink, for a degree programme at the University of Amsterdam (UvA), who are not currently listed as enrolled in that programme;
b. fixed quota degree programme: degree programme for which a limited number of students can be enrolled pursuant to Section 7.53 or 7.56 of the WHW;
c. selection: the procedure on the basis of which prospective students who have applied for a fixed quota degree programme are selected;
d. UvA Matching: the choice of degree programme activity that the UvA offers to prospective students for a given Bachelor's programme, not being a fixed quota or other selective admission degree programme, with a view to providing a recommendation on their choice of degree programme;
e. ranking number: unique number which the UvA assigns to a prospective student who has gone through the selection procedure, showing how the prospective student was assessed in comparison to the other participants in the selection procedure;
f. placement certificate: a message sent through Studielink that shows that a prospective student has completed the selection procedure for a particular fixed quota degree programme and has been placed within the relevant programme capacity. Prospective students must accept such a placement certificate in Studielink within 14 days of receipt;
g. enrolment: prospective students who meet the statutory educational entry requirements and the terms and conditions of admission stipulated in the UvA Enrolment Provisions can enrol as students at the UvA. The head of the Central Student Administration is charged with implementing the Enrolment Provisions and determines whether prospective students can enrol as a student on the programme applied for;
h. UvA Enrolment Provisions: the decision, as referred to in WHW Section 7.33, establishing the procedural rules on the basis of which students are enrolled at the UvA for a particular academic year.

Article 2

Submission of applications by 15 January

1. Prospective students who wish to take part in the selection procedure for a fixed quota degree programme must register for the programme concerned through Studielink by 15 January.
2. Prospective students who apply for the fixed quota degree programme in Medicine or Dentistry and who have applied for the same programme at another institution will not be invited to take part in the selection procedure at the UvA.[1]

[1] For Medicine and Dentistry, applying through Studielink for the same programme at multiple institutions for the same academic year is not possible.

3. Prospective students who apply for a fixed quota degree programme at the UvA who have previously applied for the same programme at the UvA will not be invited to take part in the selection procedure, unless the dean of the programme concerned has stipulated in the selection procedure that a prospective student may apply for the fixed quota degree programme concerned twice or three times, and that number has not yet been exceeded.[2]
4. Applications withdrawn by prospective students through Studielink before 15 January will be cancelled.
5. Prospective students who fail to obtain the diploma or degree certificate required for admission and withdraw their application through Studielink between 15 January and 31 August can request in writing cancellation of their application for the programme concerned for the academic year in question at the UvA.
6. Requests submitted on time, including proof that the prospective student has failed to obtain the diploma or degree certificate concerned, will be processed by the Central Student Administration before 1 October of the following academic year.

Article 3

Selection

1. Selection takes place in accordance with the selection criteria and procedure drawn up by the dean and adopted by the Executive Board.
2. The selection procedure takes into account the interests of prospective students from the public bodies of Bonaire, Sint Eustatius and Saba, and Aruba, Curaçao and Sint Maarten, respectively.
3. If the number of applications is less than the number of available places, no selection will take place, and the prospective student will be entitled to a choice of degree programme activity within the meaning of UvA matching[3].

Article 4

Ranking numbers and placement certificates

1. The UvA informs the prospective student about the results of the selection procedure through Studielink and also issues a placement certificate, or, if the prospective student is not among the prospective students eligible for admission on the basis of the selection procedure, assigns a ranking number on the basis of which any placement certificates made available can be issued.
2. A placement certificate expires by operation of law if the prospective student to whom the certificate is issued does not accept it through Studielink within 14 days of receipt.
3. The placement certificate that becomes available will subsequently be issued to the prospective student with the next ranking number, who has not yet been issued a confirmation of admission. The second paragraph applies by analogy.
4. The dean of the faculty concerned will include the deadline for the issuing of placement certificates for the programme in question in the selection procedure. This date must be between 1 August and 15 September.
5. If the dean for the programme in question does not set a deadline for the issuing of placement certificates, the deadline will be 15 September.

Article 5

Educational entry requirements and further educational entry requirements

1. Prospective students who could be admitted to a fixed quota degree programme on the basis of a placement certificate must show by 15 July that they satisfy the educational entry requirements and further educational entry requirements for the programme in question.

---

[2] This includes participation in decentralised selection and/or a draw in the past from the 2000-2001 academic year.

[3] In these cases, too, the application deadline is 15 January

2. If a prospective student cannot satisfy the requirement in the previous paragraph, the Central Student Administration will, at the request of the prospective student, set a new deadline by which this condition must be met. This deadline will be no later than 31 August, unless the prospective student is issued a placement certificate after 31 August. In that case, the deadline by which the prospective student must show that he/she satisfies the educational entry requirements and further educational entry requirements for the programme in question will be 14 days after receipt of the placement certificate.
3. If the prospective student has not fulfilled the obligation referred to in paragraph 1 and has not submitted a request for a new deadline, or if the new deadline has expired, the placement certificate will become void for the candidate concerned. Article 4, paragraphs 3 and 4, applies by analogy.

Adoption and entry into force

These regulations were adopted by the Executive Board in a decision on 25 July 2016, 2016cb0257. They took effect on 1 October 2016 and were last amended by decision on 19 September 2017 Decision no 2017-064377.

Selection English Language Track of the Bachelor's Programme in Business Administration
Procedure and Selection Criteria 2027-2028

Availability of places
For the academic year 2027-2028, the English-language track of the Bachelor's programme in Business Administration has a fixed number of places, with the total capacity set at 500.

Prior educational requirements for the English-language track of the bachelor's programme in Business Administration
Only those prospective students who satisfy the prior educational requirements for the course may be admitted to the course. Prospective students may not yet satisfy the prior educational requirements at the point when the selection is made. Prospective students who pass the selection may be admitted by the course if they satisfy the conditions set out in the "UvA selection and placement rules". As a supplement to these central rules, the English-language track of the Bachelor's programme in Business Administration issues placement certificates up to 1 August.

The Central Student Administration checks the prior educational requirements for the course.

Description of the selection for the English-language track of the bachelor's in Business Administration

Target group
All prospective students who have applied for the English-language track of the bachelor's in Business Administration via Studielink up to 15 January.
A prospective student may apply up to a maximum of two for the selection procedure.

Selection criteria
Prospective students are selected based on a combination of at least two qualitative selection criteria and a lottery. This lottery is applied to a portion of the prospective students after the decentralized selection based on qualitative criteria, which all enrolled prospective students must first pass.

Participants in the selection procedure must take a combination test on subjects that are representative of the content of the programme. All parts of the test count equally towards the calculation of the final score, which ultimately forms the basis for ranking the participants and the associated allocation of placement offers via Studielink.

The questions in the test are related to two types of qualitative skills (study skills and research skills) and knowledge and are designed to give an as comprehensive picture as possible of aptitude for the programme. Such a test measures competences and skills that are of direct importance for academic performance. Candidates who are able to distinguish between the main issue and side issues, who can work independently and acquire research skills, will score well in the combination test. As preparing for the test requires a great deal of effort, it is also a good measure of motivation.

Procedure
The selection is made in the period from 15 January (close of applications) and 15 April (notification of results via Studielink) and takes the following form:

a. There are at least two test dates from which the candidate can choose.
b. At least one week before the chosen test date, all of the study material, including any lectures, will be made available to the candidates online.
c. The candidates study the material (including any lectures) during the independent study period preceding the test. The indicative time required for this study is 20 to 25 hours.
d. The candidates take the combination test on the appointed day.

All candidates will take the test online, provided they have registered on time and correctly. The test will be conducted online for everyone under online surveillance. If they are unable to take the test online, they have the option to take it on location. To arrange this, they are required to contact the selection committee.

Ranking Numbers
The average score obtained in the different parts of the test determines an applicant's position on the ranking list. The candidates with the highest/best test results are awarded the lowest number (1, 2, 3, etc.) in the ranking list.

After this initial selection method, three groups are formed:

Group 1: highest scoring participants: ranking numbers 1-225. Candidates with the highest final scores are directly assigned a placement offer (direct offer of placement);
Group 2: middle-scoring participants: two-thirds of the remaining candidates (after the top 225) with the highest final score. This group will be subject to a lottery; weighting factor 1
Group 3: lowest scoring participants: one third of the remaining candidates (after the top 225 and middle scoring participants). This group will be subject to a lottery; weighting factor 0.

After applying the lottery (group 2 & 3), a ranking is established, and all ranking numbers are associated with a placement in Studielink. Candidates who (1) have enrolled via Studielink on or before 15 January 2027 and (2) participated in the selection procedure will receive a ranking number. Candidates who registered on time but did not complete the selection test will not receive a ranking number and will not be selected.
Candidates must respond to the offer within 14 calendar days. If they decline or fail to respond within 14 calendar days, the offer will be extended to the next candidate on the ranking list.

Prospective students from the Netherlands Antilles (ABC and BES Islands)
Candidates from the Caribbean Netherlands will be assessed using the same methods as candidates in the Netherlands and go through the same enrolment procedure. They also take the test online under online surveillance.

Information for prospective students can be found on the website:
https://www.uva.nl/bsc-business-administration
https://www.uva.nl/bsc-business-administration-en

Selection English Language Track of the Bachelor's Programme in Economics and Business Economics

Procedure and Selection Criteria 2027-2028

Availability of places
For the academic year 2027-2028, the English-language track of the Bachelor's programme in Economics and Business Economics has a fixed number of places, with the total capacity set at 550.

Prior educational requirements for the English-language track of the bachelor's programme in Economics and Business Economics
Only those prospective students who satisfy the prior educational requirements for the course may be admitted to the course. Prospective students may not yet satisfy the prior educational requirements at the point when the selection is made. Prospective students who pass the selection may be admitted by the course if they satisfy the conditions set out in the "UvA selection and placement rules". As a supplement to these central rules, the English-language track of the Bachelor's programme in Economics and Business Economics issues placement certificates up to 1 August.

The Central Student Administration checks the prior educational requirements for the course.

Description of the selection for the English-language track of the bachelor's in Economics and Business Economics

Target group
All prospective students who have applied for the English-language track of the bachelor's in Economics and Business Economics via Studielink up to 15 January.
A prospective student may apply up to a maximum of two for the selection procedure.

Selection criteria
Prospective students are selected based on a combination of at least two qualitative selection criteria and a lottery. This lottery is applied to a portion of the prospective students after the decentralized selection based on qualitative criteria, which all enrolled prospective students must first pass.

Participants in the selection procedure must take a combination test on subjects that are representative of the content of the programme. All parts of the test count equally towards the calculation of the final score, which ultimately forms the basis for ranking the participants and the associated allocation of placement offers via Studielink.

The questions in the test are related to two types of qualitative skills (study skills and research skills) and knowledge and are designed to give an as comprehensive picture as possible of aptitude for the programme. Such a test measures competences and skills that are of direct importance for academic performance. Candidates who are able to distinguish between the main issue and side issues, who can work independently and acquire research skills, will score well in the combination test. As preparing for the test requires a great deal of effort, it is also a good measure of motivation.

Procedure
The selection is made in the period from 15 January (close of applications) and 15 April (notification of results via Studielink) and takes the following form:

a. There are at least two test dates from which the candidate can choose.
b. At least one week before the chosen test date, all of the study material, including any lectures, will be made available to the candidates online.

c. The candidates study the material (including any lectures) during the independent study period preceding the test. The indicative time required for this study is 20 to 25 hours.
d. The candidates take the combination test on the appointed day.

All candidates will take the test online, provided they have registered on time and correctly. The test will be conducted online for everyone under online surveillance. If they are unable to take the test online, they have the option to take it on location. To arrange this, they are required to contact the selection committee.

Ranking Numbers
The average score obtained in the different parts of the test determines an applicant's position on the ranking list. The candidates with the highest/best test results are awarded the lowest number (1, 2, 3, etc.) in the ranking list.

After this initial selection method, three groups are formed:

Group 1: highest scoring participants: ranking numbers 1-300 Candidates with the highest final scores are directly assigned a placement offer (direct offer of placement);
Group 2: middle-scoring participants: two-thirds of the remaining candidates (after the top 300) with the highest final score. This group will be subject to a lottery; weighting factor 1
Group 3: lowest scoring participants: one third of the remaining candidates (after the top 300 and middle scoring participants). This group will be subject to a lottery; weighting factor 0.

After applying the lottery (group 2 & 3), a ranking is established, and all ranking numbers are associated with a placement in Studielink. Candidates who (1) have enrolled via Studielink on or before 15 January 2027 and (2) participated in the selection procedure will receive a ranking number. Candidates who registered on time but did not complete the selection test will not receive a ranking number and will not be selected.
Candidates must respond to the offer within 14 calendar days. If they decline or fail to respond within 14 calendar days, the offer will be extended to the next candidate on the ranking list.

Prospective students from the Netherlands Antilles (ABC and BES Islands)
Candidates from the Caribbean Netherlands will be assessed using the same methods as candidates in the Netherlands and go through the same enrolment procedure. They also take the test online under online surveillance.

Selection procedure for the Bachelor's programme in Medicine
Procedure and selection criteria for the academic year 2027-2028

Places available
The degree programme in Medicine has an enrolment quota of 342.

Educational entry requirements for the Bachelor's programme in Medicine at the UvA
Only prospective students who meet the educational entry requirements for the degree programme can be admitted to the programme. In many cases, prospective students will not meet the educational entry requirements at the time the selection procedure is carried out. Prospective students who pass the selection may be admitted to the programme if they meet the conditions set out in the Regulations on Selection and Placement of the University of Amsterdam. In addition to these central regulations, the Bachelor's programme in Medicine will only issue placement certificates until 15 September.

The educational entry requirements for the degree programme are laid down in the Teaching and Examination Regulations for the Bachelor's programme in Medicine, specifically in Articles 2.1, 2.2 and 2.3 of Part A and Articles 3.1, 3.2, 3.3 and 3.3a of Part B.

The educational entry requirements for the degree programme are checked by the Central Student Administration (CSA).

Description of the selection/draw procedure for the Bachelor's programme in Medicine at the UvA

Target group
All prospective students who apply for the degree programme in Medicine at the UvA through Studielink by 15 January at the latest. A prospective student may apply for the selection procedure for the Bachelor's programme in Medicine no more than three times.2

Selection
All prospective students who apply for the Bachelor's programme in Medicine at the UvA through Studielink by 15 January at the latest will take part in an unweighted draw.

Procedure
The selection will take place in the period between 16 January (application deadline) and 14 April (communication of results through Studielink).

Ranking numbers
All prospective students who have applied for the Bachelor's programme in Medicine at the UvA will take part in an unweighted draw by 31 March at the latest and be allotted a unique ranking number.

The place of prospective students in the ranking will be determined by the unweighted draw.

Prospective students will be informed of the outcome of the draw and their ranking numbers through Studielink on 15 April.

Prospective students from the Dutch Caribbean
Prospective students from the Dutch Caribbean (Aruba, Bonaire, Curaçao, Saba, Sint Eustatius and Sint Maarten) are subject to the same procedure as prospective students residing in the Netherlands.

Information for prospective students is available on the following website:
Admission and enrolment – Bachelor's programme in Medicine – University of Amsterdam

[2] This includes their participation in the selection procedure for the Bachelor's programme in Medicine at other institutions.

Selection English-language track Bachelor Political Science
Procedure and selection criteria 2027/2028

Availability of places

For the academic year 2027/2028, the English-language track of the Bachelor Political Science has a fixed number, in terms of which the capacity has been set at 325.

Prior educational requirements for the English-language track of the Bachelor Political Science

Only those prospective students who satisfy the prior educational requirements for the course may be admitted to the course. Prospective students may not yet satisfy the prior educational requirements at the point when the selection is made. Prospective students who pass the selection may be admitted by the course if they satisfy the conditions set out in the "UvA selection and placement rules". As a supplement to these central rules, the bachelor's programme in Political Science for the English-language track issues placement certificates up 1 August at the latest.

The Central Student Administration checks the prior educational requirements for the course.

Description of the selection for the English-language track of the Bachelor Political Science

Target group
All prospective students who have applied for the English-language track of the Bachelor Political Science via Studielink up to 15 January. A prospective student may apply up to a maximum of two times for the selection procedure.

Selection criteria
All prospective students that have applied for the English-language track of the Bachelor Political Science at the UvA in Studielink up to 15 January will take part in an unweighted lottery.

Procedure
The selection is made in the period from 15 January (close of applications) and 15 April (notification of results via Studielink).

Sequential numbers
All prospective students who have applied by 15 January 2027 at the latest in Studielink will receive a ranking number. The ranking is determined by means of unweighted lottery. Prospective students with rank numbers 1-325 are immediately offered a placement certificate. With a rank number of 326 or higher, prospective students (in order of rank number) must wait until placement certificates become available.

Prospective students from the Netherlands Antilles (ABC and BES Islands)
Prospective students from the Dutch Caribbean follow the same procedure as the candidates residing in the Netherlands.

Information for prospective students can be found on the website:
https://www.uva.nl/shared-content/programmas/en/bachelors/political-science/application-and-admission/application-and-admission.html (note: link not yet up to date, will be updated).

Selection for the Dutch-language and English-language Track of the Bachelor of Psychology Programme
Selection Criteria and Procedure 2027-2028

Places available
For academic year 2027-2028, the English-language track of the Psychology bachelor's programme has a numerus fixus with capacity set at 270 places and the Dutch-language track has a numerus fixus with capacity set at 330 places.

Educational entry requirements for the Dutch-language and English-language track of the Bachelor of Psychology programme
Only prospective students who meet the educational entry requirements of the programme can be admitted to the programme. In many cases, prospective students may not yet meet the prior education requirements at the time the selection is carried out. Prospective students who pass the selection may be admitted to the programme if they meet the conditions set out in the Regulations on Selection and Placement of the University of Amsterdam. In addition to these central regulations, the Psychology bachelor's programme issues certificates of placement for both the Dutch-language track and the English-language track until 15 August 2027 at the latest.

The previous education requirements for the programme are laid down in the Teaching and Examination Regulations (TER) of the Psychology programme in articles 2.1, 2.2, 2.3, and 2.4 of the TER part A and articles 3.1, 3.2, and 3.3 of the TER part B.

The prior education requirements for the programme are checked by the Central Student Administration.

Description of the selection for the Bachelor of Psychology programme

Target group
All prospective students who have applied via Studielink by 15 January 2027 at the latest for either the Dutch-language or the English-language track of the Bachelor of Psychology programme.
A prospective student may not apply for both the Dutch- and English-language track for the same academic year. In that case, the first application applies.
A prospective student may only apply once for the selection procedure for the Bachelor's programme in Psychology.

Selection criteria
The two qualitative selection criteria are based on psychological theory on the one hand and research methods and statistics on the other.
Prospective students take a test for each criterion. The tests count equally towards the calculation of the final score, which ultimately forms the basis for the ranking of prospective students within each track and the corresponding placement via Studielink.

The topics tested come from the psychological theory learning lines (comparable to the material from the first-year course *Introduction to Psychology*) and from the psychological methods learning line (comparable to the material from the first-year course *Research Methods and Statistics*). The programme starts with these two courses, thus the topics chosen are representative of the beginning of the psychology programme. Moreover, the topics are representative of the entire programme given the central role of psychological theorisation and research methods in it. Prospective students who can distinguish main and minor issues, work independently and acquire research skills will score well on the tests.

In establishing the selection procedure, it was taken into account that many of the methods for measuring motivation are unreliable. Motivation is best measured directly by requiring significant effort from the prospective student. Therefore, to pass the tests successfully, prospective students are expected to spend about 20-25 hours of independent study.

Procedure
Selection takes place between 15 January (deadline for application) and 15 April (announcement of results via Studielink) and is organised as follows:

1. There are two[3] test days from which the prospective student can choose.
2. One week before the chosen test day, lectures will be offered on location[4] explaining the subject matter. Attendance at these lectures is not compulsory; they will also be made available online.
3. One week before the chosen test day, all study materials are made available online to all prospective students through the digital learning environment. Practice tests are part of the study materials.
4. Prospective students may study the material during the one-week self-study period prior to the test day and, if desired, participate in on-site lectures. The indicative time needed to prepare for the tests is 20 to 25 hours.
5. During the test day, prospective students take two tests online[5] to measure their cognitive traits and study skills. Online proctoring takes place during the tests.

The procedure is exactly the same for the Dutch-language track and the English-language track.

Ranking numbers
There are two ranking lists, one for the Dutch-language track and one for the English-language track. The weighted average score on the tests (hereafter referred to as final score) determines the prospective student's place in the respective ranking lists. For each ranking list, there are three groups.

For the Dutch-language track, the following applies:

- High-score group: 1–110, the 110 prospective students with the highest final score are directly assigned a place.
- Average-score group: two-thirds of the remaining (after the 110 highest-scoring) prospective students with the highest final score; a draw will be held for this group, weighting factor 1.
- Low-score group: the remaining prospective students (after the high-score group and the average-score group) with the lowest final score; a draw will be held for this group, weighting factor 0.

For the English-language track*, the following applies*:

- High-score group: 1-90, the 90 prospective students with the highest final score are directly allocated a place.
- Average-score group: two-thirds of the remaining (after the 90 highest-scoring) prospective students with the highest final score; a draw will be held for this group, weighting factor 1.
- Low-score group: the remaining prospective students (after the high-score group and the average-score group) with the lowest final score; a draw will be held for this group, weighting factor 0.

Prospective students from the Netherlands Antilles (ABC and BES islands)
Prospective students from the Netherlands Antilles are treated in the same way as all other prospective students.

Information for prospective students:
More information for interested parties and prospective students is available on our websites.

[3] More if required by the number of prospective students
[4] If possible according to RIVM guidelines
[5] On-site testing can be requested

Selection procedure for Biomedical Sciences
Procedures and selection criteria for 2027-2028

Places available
For the academic year 2027-2028, the Bachelor's programme in Biomedical Sciences has an enrolment quota of 175.

Educational entry requirements for the Bachelor's programme in Biomedical Sciences
Only prospective students who meet the educational entry requirements for the degree programme can be admitted to the programme. In many cases, prospective students will not meet the educational entry requirements at the time the selection procedure is carried out. Prospective students who pass the selection may be admitted to the programme if they meet the conditions set out in the Regulations on Selection and Placement of the University of Amsterdam. In addition to these central regulations, the Bachelor's programme in Biomedical Sciences will only issue placement certificates until 31 August.

The educational entry requirements for the degree programme are checked by the Central Student Administration (CSA).

Description of the selection procedure for Biomedical Sciences 2027-2028

Target group
All prospective students who apply for the Bachelor's programme in Biomedical Sciences through Studielink by 15 January at the latest. A prospective student may apply for the selection procedure no more than twice.

Selection
If the number of applications is 176 or more, an unweighted draw will be conducted in which all prospective students who have applied have an equal chance. In this unweighted draw, all prospective students will be allotted a unique ranking number.
Prospective students allotted ranking numbers 1 to 175 will be offered a placement certificate immediately. For prospective students allotted ranking numbers 176 and up, vacant placements will be offered in order of ranking number.

Prospective students will receive the ranking number allotted in the draw through Studielink by 15 April 2027.

Prospective students from the Dutch Caribbean
Prospective students from the Dutch Caribbean who apply for the programme through Studielink by 15 January at the latest are subject to the same procedure as prospective students residing in the Netherlands.

Information for prospective students is available on the following website:
https://www.uva.nl/programmas/bachelors/bio-medische-wetenschappen/toelating-decentrale-selectie-en-inschrijving/toelating-en-inschrijven.html?origin=JwXVf7XuSXqGCBqyzYCU0w

Selection procedure for Psychobiology
Procedures and selection criteria for 2027-2028

Places available
For the academic year 2027-2028, the Bachelor's programme in Psychobiology has an enrolment quota of 250.

Educational entry requirements for the Bachelor's programme in Psychobiology
Only prospective students who meet the educational entry requirements for the degree programme can be admitted to the programme. In many cases, prospective students will not meet the educational entry requirements at the time the selection procedure is carried out. Prospective students who pass the selection may be admitted to the programme if they meet the conditions set out in the Regulations on Selection and Placement of the University of Amsterdam. In addition to these central regulations, the Bachelor's programme in Psychobiology will only issue placement certificates until 31 August.

The educational entry requirements for the degree programme are checked by the Central Student Administration (CSA).

Description of the selection procedure for Psychobiology 2027-2028

Target group
All prospective students who apply for the Bachelor's programme in Psychobiology through Studielink by 15 January at the latest. A prospective student may apply for the selection procedure no more than twice.

Selection
The selection criteria have been designed in such a way as to be the best possible predictors of study success. The selection week covers a number of key components of the degree programme: gaining knowledge and insights, processing information, self-study and reproducing knowledge and insights. Prospective students will attend lectures (either on site or online), study independently using literature and a virtual learning environment and sit a test on the course material.

The subjects cover part of the learning objectives of the degree programme relating to knowledge and understanding and provide a representative picture of the programme (the curriculum sampling method). Prospective students will perform well in the test if they are able to distinguish between main and minor points, work independently and apply the knowledge and insights they have gained.

The non-cognitive element relates to assessing prospective students on their motivation and learning strategies. Prospective students will be assessed on their ability to reflect on their attitude toward their studies (including their orientation on the course material, planning and methods of study).

Successfully completing the overall selection procedure (participating in the education day, self-study and sitting the test) will require a commitment of 20-24 hours. This means that motivation will indirectly co-determine prospective students' admission to the degree programme.

Ranking numbers
The place of prospective students in the ranking for the draw will be determined by their final score for the test. For the draw, the number of available places has been divided into two categories:

1. High score
   The 85 prospective students with the highest final score will be allotted a place immediately.
2. Other scores
   Average-score group = two-thirds of the remaining prospective students with the highest final score (after the 85 highest scoring): lots will be drawn for this group, with students assigned a weighting factor of 2.
   Low-score group = the remaining prospective students (after the high-score group and the average-score group) with the lowest final score: lots will be drawn for this group, with students assigned a weighting factor of 1.

Prospective students will receive the ranking number allotted in the draw through Studielink by 15 April 2027.

Procedure
The selection will take place in the period between 15 January (application deadline) and 15 April (communication of results through Studielink). The procedure is as follows:

a. Three weeks prior to the test day, the course material will be made available to all participants online through Canvas.
b. Within the three weeks preceding the test day, two half-day sessions consisting of lectures on the course material will be offered on site. Attending these lectures is not compulsory, and they will also be made available online.
c. Prospective students can study the course material during the three-week independent study period preceding the test and may, if desired, attend on-site lectures. Approximately 12-18 hours of self-study will be required.
d. On the concluding test day, the prospective students will sit a test to assess their cognitive traits and, indirectly, their non-cognitive traits (motivation).

Prospective students from the Dutch Caribbean
Prospective students from the Dutch Caribbean (Aruba, Bonaire, Curaçao, Saba, Sint Eustatius and Sint Maarten) who applied for the degree programme through Studielink before 15 January and meet or will be meeting the educational entry requirements will be given the opportunity to sit the same test at another location under controlled conditions.

Information for prospective students is available on the following website:

Selection procedure for ACTA Faculty Dentistry
Procedures and selection criteria for 2027-2028

Introduction
For the academic year 2027-2028, ACTA's selection procedure will be an unweighted draw.

Prospective students who wish to enrol in the Dentistry programme at ACTA may apply to only one institution for a given academic year, meaning they must choose between either Vrije Universiteit Amsterdam (VU Amsterdam) or the University of Amsterdam (UvA).

Places available
The enrolment quota for the intake of first-year students in the Bachelor's programme at ACTA for the academic year 2027-2028 is 138 – 75 places at the UvA and 63 at VU Amsterdam.

Admission requirements
The educational entry requirements for the Bachelor's programme in Dentistry at ACTA are laid down in the Teaching and Examination Regulations for the Bachelor's programme in Dentistry.

Prospective students can register for ACTA's selection procedure once through the UvA and once through VU Amsterdam (but not for the same academic year).

To participate in the selection procedure, prospective students must apply through Studielink **by 23:59 CET on 15 January at the latest** in the academic year prior to the academic year for which they wish to enrol.

The educational entry requirements for the degree programme are checked by the Central Student Administration (CSA).

Timetable
- By 23:59 CET on 15 January prior to the academic year for which prospective students wish to enrol at the latest: the prospective student must register through Studielink.
- On 15 April prior to the academic year for which prospective students wish to enrol: announcement of the ranking number.

Ranking numbers
- Although there is a single ACTA training institute, the UvA and VU Amsterdam each conduct their own selection procedure. 75 places are available through the UvA and 63 places through VU Amsterdam. Prospective students must apply at one institution or the other.

- Every prospective student who applies through Studielink before the deadline will receive a ranking number for the unweighted draw at the institution in question.

Placement certificates/written confirmations of admission
The deadline for issuing placement certificates/written confirmations of admission for the Bachelor's programme is 31 August prior to the academic year for which prospective students wish to enrol.

Prospective students from abroad
- Prospective students from the Dutch Caribbean are subject to the same selection procedure as prospective students residing in the Netherlands.
- Other prospective students from abroad are subject to the same selection procedure as prospective students residing in the Netherlands.

Appendix 10

UvA Regulations on Student Intake in the Post-Propaedeutic Phase
adopted by decision of 23 October 2018, decision number 2018-070395, and the faculty regulations for the Bachelor's programmes in Psychology, Dentistry, Business Administration and Economics and Business Economics, adopted by decisions of respectively 9 October 2024, number 2024-104616, 2 September 2025, number 2025-129814 and 25 August 2026, number 2026-052627.

UVA REGULATIONS ON STUDENT INTAKE IN THE POST-PROPAEDEUTIC PHASE

adopted by decision no. 2018-070395 of the Executive Board of 23 October 2018,

for degree programmes with an enrolment quota within the meaning of Section 7.53 and 7.56 of the Higher Education and Research Act (WHW).

Article 1

Due to the inadequacy of the teaching capacity available for the degree programmes for which an enrolment quota within the meaning of Section 7.53 or 7.56 of the WHW applies, enrolment in the post-propaedeutic phase of these degree programmes will be refused to those who have not already been enrolled in the relevant degree programme at the University of Amsterdam.

Article 2

If the teaching capacity for the relevant degree programme in the relevant academic year is adequate, the dean of the faculty to which the degree programme belongs may, on behalf of the Executive Board, grant dispensation from this refusal in individual cases:

a. in the case of unique, extremely urgent personal circumstances by virtue of which the degree programme cannot be continued at the student's own institution, or
b. on the basis of further regulations governing intake for the post-propaedeutic phase of the relevant degree programme that have been prepared by the dean of the faculty to which the degree programme belongs and adopted by the Executive Board.

Article 3

A request for admission by virtue of Article 2 must be submitted through Studielink. The Student Counsellors Department issues advice concerning the existence of unique, extremely urgent personal circumstances.

Article 4

The dean of the faculty to which the degree programme belongs decides on behalf of the Executive Board.

Article 5

A decision on admission applies exclusively to the academic year for which it has been issued.

Article 6

These regulations were adopted by the Executive Board by decision of 28 October 2018 with decision number 2018-070395 and come into force on 1 October 2018.

EXPLANATION OF THE REGULATIONS ON STUDENT INTAKE IN THE POST-PROPAEDEUTIC PHASE

for the degree programmes with an enrolment quota within the meaning of Section 7.53 and 7.56 of the WHW.

With respect to the degree programmes for which an enrolment quota within the meaning of Section 7.53 or 7.56 has been determined, the initial enrolment as a student in the propaedeutic phase of these degree programmes is only possible if the relevant individual is in possession of a confirmation of admission issued through Studielink. No confirmation of admission is required for enrolment in the post-propaedeutic phase. That means that the enrolment quota could be bypassed without any further arrangements being required. If UvA had to enrol an unlimited number of students, capacity problems could still occur.

Based on Section 7.54 of the WHW, it is possible to refuse enrolment in the post-propaedeutic phase to those who have not already been enrolled in the relevant degree programme at UvA. To this end, UvA adopted the Regulations governing intake for the post-propaedeutic phase for Psychology, Dentistry and Medicine.

Not all Bachelor's programmes have a propaedeutic year. In the WHW, a 'post-propaedeutic phase' is also understood to mean the phase of the Bachelor's programme that follows the initial period of the programme representing a workload of 60 credits.

If the teaching capacity in the relevant academic year allows, it is, in certain cases, possible to depart from the refusal of admission. This is subject to the existence of unique, extremely urgent circumstances. These can include: medical and/or psychological grounds, social and/or economic grounds, refugee status, family reunification and residence with one's partner in the Netherlands. Furthermore, it is possible to depart from the refusal of admission on the basis further regulations governing intake for the post-propaedeutic phase of the relevant degree programme that have been prepared by the dean of the faculty to which the degree programme belongs and adopted by the Executive Board.

REGULATIONS GOVERNING INTAKE FOR THE POSTPROPAEDEUTIC PHASE FOR DENTAL HYGIENISTS

Version 29 August 2024, adopted by Decision No. 2024-104616 of the UvA Executive Board, 9 October 2024

Depending on available capacity in the post-propaedeutic phase of the degree programme, up to eight Oral Hygiene graduates – following a selection procedure in the form of an unweighted lottery – may be admitted to the second year of the Bachelor's programme in Dentistry (ACTA) in each academic year.

Candidates must enrol via Studielink as an upper-year student **by no later than 23:59 CET on 15 January** preceding the academic year for which they wish to be enrolled.

SELECTION PROCEDURE REQUIREMENTS

To participate in the selection procedure, candidates must meet the following requirements **by no later than on 1 May** preceding the academic year for which they wish to be enrolled:

1. Hold a Dutch Bachelor's diploma in Oral Hygiene (obtained after 1 September 2005).
2. Hold a pre-university diploma with subject cluster Nature & Health plus Physics or Nature & Technology plus Biology (obtained after 1 September 2010), is in possession of modular certificates at pre-university education level/certificates of admission in Physics, Mathematics A or B, Biology and Chemistry, or has been granted exemption therefrom based on Section 7.28 or 7.29 of the WHW.
3. Have 750 hours of proven professional experience as a qualified dental hygienist (a recent employer's statement, including the business details of the relevant practice, will be required so that ACTA can perform a reference check).
4. Hold a valid hepatitis B certificate.
5. Have enrolled via Studielink in time for the academic year following the selection procedure. 6. Not have previously participated in the selection procedure for the post-propaedeutic phase for dental hygienists.

The documents showing that the candidate meets requirements 1 to 4 above must be submitted in digital form via studie-info@acta.nl by no later than **1 May** preceding the academic year for which the candidate wishes to be enrolled.

Unweighted lottery

The lottery draw will be performed in the same manner and on the same day as for prospective first-year students in the Bachelor's programme in Dentistry.
The draw will take place in the period between 16 January and 7 April preceding the academic year for which the candidate wishes to be enrolled.

ADMISSIONS BOARD

Decisions on admission to the post-propaedeutic phase are assigned to the Admissions Board.
The ranking number assigned to the candidate in the unweighted lottery draw will be announced no later than 10 May preceding the academic year for which they wish to be enrolled. An admission decision may be issued to the candidate based on the order of ranking if, on the reference date of 1 May preceding the academic year for which the candidate wishes to be enrolled, they meet all the requirements as set out under 1 to 4 of these Regulations.

The admission decision will only apply for the academic year that follows the selection procedure based on the unweighted lottery.

ENROLMENT REGULATION FOR POST-PROPAEDEUTIC PHASE, BACHELOR OF BUSINESS ADMINISTRATION

Students may enrol into the second year of the Bachelor of Business Administration if they satisfy the following conditions. They must apply as higher year students via Studielink.

Conditions:

- The students must satisfy the conditions set out in the Scheme in the Student Transfer and Articulation Agreement Shanghai University, SILC on 15 December 2017 and hold an exemption issued by the Dean of the FEB.

OR

- The students must satisfy the conditions in the Scheme in the Memorandum of Agreement between Universiteit van Amsterdam and Faculty of Economics, University of Indonesia and hold an exemption issued by the Dean of FEB.

Exemption from full first year (60 EC): the exemption is issued by the Dean of the FEB no later than 31 August in the academic year before the academic year to which the enrolment application relates and is only valid for that academic year.

ENROLMENT REGULATION, POST-PROPAEDEUTIC PHASE, BACHELOR OF ECONOMICS AND BUSINESS ECONOMICS

Students may enrol into the second year of the Bachelor of Economics and Business Economics if they satisfy the following conditions. They must apply as higher year students via Studielink.

Conditions:

- The students must satisfy the conditions in the Regulation in the Memorandum of Agreement between Universiteit van Amsterdam and Faculty of Economics, University of Indonesia and hold an exemption issued by the Dean of FEB.

Exemption from full first year (60 EC): the exemption is issued by the Dean of the FEB no later than 31 August in the academic year before the academic year to which the enrolment application relates and is only valid for that academic year.

UNIVERSITY OF AMSTERDAM

REGULATIONS ON STUDENT INTAKE IN THE POST-PROPAEDEUTIC PHASE FOR THE BACHELOR'S PROGRAMME IN PSYCHOLOGY

Adopted by decision number 2026-052627 of the Executive Board of 25 August 2026

Students who satisfy the requirements set out below can be admitted to the second year of the Bachelor's programme in Psychology.

They must enrol as upper-year students through Studielink.

Admission requirements:

- successful completion of the first year of the Bachelor's programme in Psychobiology; and
- at least 30 ECTS obtained for the first-year units of study available for the University of Amsterdam's Bachelor's programme in Psychology as a student who is enrolled for an optional course during enrolment in the Bachelor's programme in Psychobiology.

Admission decision:

The admission decision is issued by the dean of the Faculty of Social and Behavioural Sciences by no later than 31 August in the academic year preceding the academic year in which the student will start and applies only to the following academic year.
