

Water management and Water Supply

Entry Requirements Desertification & Land Degradation:

- Passed the TOEFL test with a score ≥ 570 (paper test), ≥ 230 (computer test) or ≥ 89 (Internet test).
- Students with a background in social science must have successfully completed one semester (i.e. a study load of at least half of an academic year) in natural sciences courses related to Earth Sciences, Environmental Sciences, Biology, Ecology, or Climatology.
- Students with a background in one of the natural sciences are admitted to the course.

Entry Requirements Water Governance:

- Passed the TOEFL test with a score ≥ 570 (paper test), ≥ 230 (computer test) or ≥ 89 (Internet test).
- Students with a background in social science are admitted to the course.
- Students with a background in one of these natural sciences must have required some background knowledge in human geography and/or spatial planning.

Entry Requirements Water Quality:

- Passed the TOEFL test with a score ≥ 570 (paper test), ≥ 230 (computer test) or ≥ 89 (Internet test).
- Students with a background in social science must have successfully completed one semester (i.e. a study load of at least half of an academic year) in natural sciences courses related to Earth Sciences, Environmental Sciences, Biology, Ecology, or Climatology.
- Students with a background in one of these natural sciences are admitted to the course.

Entry Requirements Water Management:

- Passed the TOEFL test with a score ≥ 570 (paper test), ≥ 230 (computer test) or ≥ 89 (Internet test).
- Students with a background in social science must have taken the previous course on Water Quality.
- Students with a background in one of the natural sciences are admitted to the course

Entry Requirements Interdisciplinary Project on water:

- Passed the TOEFL test with a score ≥ 570 (paper test), ≥ 230 (computer test) or ≥ 89 (Internet test).
- Students must have written a Research Proposal on a water related subject.
- Students must have some acquaintance with doing interdisciplinary research.
- If one of these last two requirements is not fulfilled, students must have read all the compulsory literature from Repko's book on *Interdisciplinary Research* (2012).
(For more information on the compulsory literature contact Dr. Coyan Tromp; j.c.tromp@uva.nl).

Entry Requirements Research Proposal:

- Passed the TOEFL test with a score ≥ 570 (paper test), ≥ 230 (computer test) or ≥ 89 (Internet test).
- Students with a background in social science must have taken the previous course on Water Quality.
- Students with a background in one of the natural sciences must have taken either the previous course on Water Quality or on Water Management (or both).
